

**California Health & Human Services Agency
Data Exchange Framework Implementation Advisory Committee Meeting
Q&A Log (9:00 AM – 11:30 AM, September 25, 2025)**

The following table shows comments that were entered into the Teams Q&A by attendees during the September 25, 2025 meeting:

Count	Name	Comment	Response(s)
1	Aaron Goodale	I didn't have a good opportunity to chime in earlier, but I want to echo Felix's comments. Because timely receipt of ADTs is so critical for safe, coordinated patient care, we don't believe the deadline should be extended further. We fully recognize that SNFs often face resource constraints that larger organizations don't, and we appreciate the effort it takes to implement these requirements. That said, facilities with an EHR should already be able to comply, and those needing additional technology have had significant time to plan and prepare. Our priority remains ensuring patients experience seamless care transitions, which relies on this data flowing without delay.	Thanks, Aaron. Your comment is noted.
2	Aaron Goodale	On the previous slide: Could we ask who they are requesting information from where they have to utilize phone, fax, portals. Could it be that group are those we already know have not adopted the DxF yet?	Thanks. We will look at adjusting the 2026 survey to address that issue.
3	Rim Cothren	John H. asked a question re: who responded to the survey by organization type. You will find a	

		breakdown of respondents in the materials from the last IAC meeting on 7/17 on slide 23.
