California Health & Human Services Agency
Data Exchange Framework Technical Advisory Committee (TAC) Meeting
Chat Log (12:00 PM – 1:00 PM PT, September 4, 2025)

The following comments were made in the Zoom chat log by Members of the TAC and staff during the September 4, 2025, meeting:

15:09:49 From Ray Duncan to Hosts and panelists:
    I'm assuming that recipient means that DXF participating organization and not the PCP. The organization could do an additional layer of identity vetting.

15:11:41 From Akira Vang | DxF HCAI to Hosts and panelists:
    Panelist please change your chat to "Everyone" to allow the public to see your chat.

15:15:05 From Michael Marchant to Everyone:
    agree with a minimum necessary

15:19:08 From David McCann to Everyone:
    I would argue. ,Eric, intermediaries already exist in every county..and are capturing Consent.. 211 is for Social Care

15:19:21 From David McCann to Everyone:
    As do QHIO"s

15:19:58 From David McCann to Everyone:
    DXF Roadmap acknowledges QHIO Intermediaries and non QHIO Intermediaries.. that is where Consent already IS . And it is in a hospital EPIC system

15:20:15 From David McCann to Everyone:
    So " NODES' already exist..

15:22:54 From David McCann to Everyone:
    211's are ' non QHIO interemediaries"

15:24:13 From David McCann to Everyone:
    Ken, in my view, no.21st Century CURES act allows for Reasonable Exception - including unreasonable cost burden.

15:25:20 From David McCann to Everyone:
    Medical use case v Social Care - different policy model.

15:28:18 From David McCann to Everyone:

Wish this question had 3 ANSWER CHOICES.. not binary Yes/ No. What about " depends".

15:42:23 From Ray Duncan to Everyone:
As a participant I only want to upload rosters to one place.

15:43:23 From Michael Marchant to Everyone:
DxF should support centralized roster management - regardless of centralized vs distributed participation

15:44:14 From Tim Polsinelli to Everyone:
+1 Ray

15:45:38 From David McCann to Everyone:
I am fundementally convinced Centralized Roster management will fail. It's the antithesis of innovation, and implies slow

15:46:21 From Rim Cothren, HCAI DxF to Everyone:
Catalina: You can go ahead and bring down the slides.

15:49:18 From Ray Duncan to Everyone:
The current national networks have succeeded by setting standards that are "good enough." Allowing all participants in the national networks to dream up any technology they feel is interesting would have been a recipe for failure. DXF needs to set a standard and a process for roster management in order for this to scale successfully. If every county goes down their own path nothing much will happen. California has many years of history with trying to get a statewide RIO going and it fizzling out.

15:56:16 From David McCann to Everyone:
To be clear many participants want ONE node.. but United Way 211 sees SEVERAl nodes in a county… and DOUBT one node in a county emerging
